T. H. Breen introduces us to the ordinary men and women who took responsibility for the course of the American revolution. Far from the actions of the Continental Congress and the Continental Army, they took the reins of power and preserved a political culture based on the rule of law, creating America's political identity in the process. The fascinating history of bell music The carillon, the world's largest musical instrument, originated in the 16th century when inhabitants of the Low Countries started to produce music on bells in church and city towers. Today, carillon music still fills the soundscape of cities in Belgium and the Netherlands. Since the First World War, carillon music has become popular in the United States, where it adds a spiritual dimension to public parks and university campuses. Singing Bronze opens up the fascinating world of the carillon to the reader. It tells the great stories of European and American carillon history: the quest for the perfect musical bell, the fate of carillons in times of revolt and war, the role of patrons such as John D. Rockefeller Jr. and Herbert Hoover in the development of American carillon culture, and the battle between singing bronze and carillon electronics. Richly illustrated with original photographs and etchings, Singing Bronzetells how people developed, played, and enjoyed bell music. With this book, a fascinating history that is yet little known is made available for a wide public. This lively and erudite cultural history examines how Scottish identity was experienced and represented in novel ways. Knit two socks at a time, while working from the toe up! Philadelphia 1777 is no place for the faint of heart. The rumble of war with the British grows louder each day, and spies for and against the Patriots are everywhere. No one is above suspicion. Still, everyday life must go on and young Maddy Rose must help her mother, especially since her father's death at the Battle of Princeton and now with her beloved brother Jonathan off with Washington's army. But when childhood games become life-and-death actions, Maddy Rose is drawn ever deeper into events that will explode beyond her imagining. As young America stands on the very brink of its fight for freedom, it becomes clear that even the smallest of citizens can play the largest of parts, and that the role of a patriot has nothing to do with age and everything to do with heart. Because Robert Papp's childhood drawings of his favorite superheros were such a pleasure, it was only natural that he would wind up an illustrator. Nowadays, his award-winning artwork appears on book covers and in magazines instead of on the refrigerator. He has produced hundreds of cover illustrations for major publishers across the United States. Robert lives in historic Bucks County, Pennsylvania. Catalogue published in conjunction with the exhibition "Extravagant Inventions: the Princely Furniture of the Roentgens" on view at The Metropolitan Museum of Art, New York, from October 30, 2102, through January 27, 2013. In this important contribution to narrative theory, Marie-Laure Ryan applies insights from artificial intelligence and the theory of possible worlds to the study of narrative and fiction. For Ryan, the theory of possible worlds provides a more nuanced way of discussing the commonplace notion of a fictional "world," while artificial intelligence contributes to narratology and the theory of fiction directly via its researches into the cognitive processes of texts and automatic story generation. Although Ryan applies exotic theories to the study of narrative and to fiction, her book maintains a solid basis in literary theory and makes the formal models developed by AI researchers accessible to the student of literature. By combining the philosophical background of possible world theory with models inspired by AI, the book fulfills a pressing need in narratology for new paradigms and an interdisciplinary perspective. Bruce Redford re-creates the vibrant culture of connoisseurship in Enlightenment England by investigating the multifaceted activities and achievements of the Society of Dilettani. Elegantly and wittily he dissects the British connoisseurs whose expeditions, collections, and publications laid the groundwork for the Neoclassical revival and for the scholarly study of Graeco-Roman antiquity. After the foundation of the society in 1732, the Dilettani commissioned portraits of the members. Including a striking group of mock-classical and mock-religious representations, these portraits were painted by George Knapp, Sir Joshua Reynolds, and Sir Thomas Lawrence. During the second half of the century, the society's expeditions to the Levant yielded a series of pioneering architectural folios, beginning with the first volume *The Antiquities of Athens* in 1762. These monumental volumes aspired to empirical exactitude in text and image alike. They prepared the way for *Specimens of Antient Sculpture* (1809), which combines the didactic (detailed investigations into technique, condition, restoration, and provenance) with the connoisseurial (plates that bring the illustration of ancient sculpture to new artistic heights). The Society of Dilettanti's projects and publications exemplify the Enlightenment ideal of the gentleman amateur, which is linked in turn to a culture of wide-ranging curiosity. The essays in this volume discuss the visible elements, such as clothing, jewellery, the opulence of the elite, fashion and styles, but they also inform the reader about the manner in which these were connected to political and social developments. The articles in this volume highlight important themes regarding the history of textiles, the shifting of trading and manufacturing centres, the professionalization of the various fields in the history of fashion, and the connection with the introduction and proliferation of steam-powered machines and later of electrical equipment. Clothes and garments are also part of the social and political transformations brought about by the multiple modernisations of the various Balkan societies. Fabrics, colours, threads, barrels and buttons, lace and jewellery are marvellous documents that bring to life details of the remote worlds of our ancestors, helping us understand the complex meanings of sartorial appearances. The Balkans and the Orient are regions that offer promising avenues of multidisciplinary research concerning clothes and fashion as indicators of social status and political change. The Far East comes alive in this activity book centered on Marco Polo's journey to China from Venice along the 13th-century Silk Road. Kids will join Marco as he travels by caravan through vast deserts and over steep mountain ranges, stopping in exotic cities and humble villages, until at last he arrives at the palace of the Kublai Khan. Woven throughout the tale are 21 activities that highlight the diverse cultures Marco encountered along the way. Activities include making a mythical map, creating a mosaic, fun with Feng Shui, making paper, and putting on a wayang-kulit (shadow-puppet play). Just for fun, kids will learn a few words of Turkish, Persian, Mongol, Hindi, and Chinese. A complete resource section with magnificent museums and their Web sites invites kids to embark on their own expedition of discovery. A "deeply researched and bracing retelling" (Annette Gordon-Reed, Pulitzer Prize – winning historian) of the American Revolution, showing how the Founders were influenced by overlooked Americans—women, Native Americans, African Americans, and religious dissenters. Using more than a thousand eyewitness records, *Liberty Is Sweet* is a "spirited account" (Gordon S. Wood, Pulitzer Prize – winning author of *The Radicalism of the American Revolution*) that explores countless connections between the Patriots of 1776 and other Americans whose passion for freedom often brought them into conflict with the Founding Fathers. "It is all one story," prizewinning historian Woody Holton writes. Holton describes the origins and crucial battles of the Revolution from Lexington and Concord to the British surrender at Yorktown, always focusing on marginalized Americans—enslaved Africans and African Americans, Native Americans, women, and dissenters—and on overlooked factors such as weather, North America's unique geography, chance, misperception, attempts to manipulate public opinion, and (most of all) disease. Thousands of enslaved Americans exploited the chaos of war to obtain their own freedom, while others were given away as enlistment bounties to whites. Women provided material support for the troops, sewing clothes for soldiers and in some cases taking part in the fighting. Both sides courted native people and mimicked their tactics. *Liberty Is Sweet* is a "must-read book for understanding the founding of our nation" (Walter Isaacson, author of *Benjamin Franklin*), from its origins on the frontiers and in the Atlantic ports to the creation of the Constitution. Offering surprises at every turn—for example, Holton makes a convincing case that Britain never had a chance of winning the war—this majestic history revivifies a story we thought we already knew. Rhyming text describes a great variety of hats worn by celebrities throughout history. An accessible guide to understanding and using Spoonflower to design your own fabric, wallpaper, and gift wrap.
